[Linkdin/MoinuddinKhan](#) | [GitHub/Moin06-dev](#) | [Portfolio](#) | [Mumbai, India](#)

Full Stack Developer | React.js | Node.js | MongoDB | Building Scalable Web Applications

Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frameworks & Databases: React.js, Node.js, Express.js, React Router, Redux, Tailwind, Axios, MongoDB, MySQL

Tools & Platforms: GitHub, Postman, VS Code, Render, Vercel, Netlify

Experience

Software Developer | Hudl | Hybrid | Mumbai

Oct 2024 – Present

Core Responsibilities

- Worked with backend, design, and QA teams to build and improve core React.js features for live sports platforms.
- Collaborated closely with product managers to translate complex requirements into intuitive, high-performing user interfaces.
- Created clean and responsive UIs using React, Tailwind CSS, and Figma, ensuring smooth user interaction across devices.
- Managed API integrations and state handling with React Query while keeping the codebase well-structured and maintainable.
- Implemented reusable UI patterns and hooks to streamline development and ensure consistency across modules.

Key Achievements

- Refactored existing code into clean, reusable components — making the project easier to maintain and reducing bugs by 35%.
- Improved frontend speed using lazy loading, memoization, and code splitting — cutting initial load time by 40%.
- Integrated Razorpay and Cashfree payment gateways with proper error handling and transaction tracking for a smoother user experience.

Key Projects

- Player Performance Tracker – Built a responsive dashboard with React and React Query for real-time player stats.
- Match Highlights Portal – Developed a video highlights interface with caching and lazy loading for smoother playback.
- Coach Review Platform – Created analytics filters and search features to enhance user experience.

Full Stack Developer | DigiChefs | Mumbai

Feb 2024 – Sep 2024

Core Responsibilities

- Developed REST APIs with Node.js & Express and connected them to React dashboards for real-time reporting — improving data response speed by 20%.
- Built responsive, mobile-first UI components with React.js and Tailwind CSS — enhancing cross-device performance by 25%.
- Managed MongoDB schemas and integrated data for smooth frontend–backend workflow — reducing data fetch issues by 20%.

Key Achievements

- Optimized API queries and data handling logic, improving overall response times and backend efficiency by 20%.
- Enhanced frontend performance through caching and code optimization, achieving up to 35% faster page loads across modules.

Key Projects

- Client Websites—Responsive UI components for multiple projects.
- Component Library – Reusable components documented

Qualification

- MCA – Master of Computer Applications | Mumbai University (2022–2024) | CGPA: **8.24**
- B.Sc. – Information Technology | Mumbai University (2019–2022) | CGPA: **7.77**

Projects

Book Store (React, Tailwind, REST API) | [[GitHub](#)]

- Online marketplace with advanced search & cart system.
- Improved discoverability by 35% with optimized frontend.
- Ensured 100% mobile responsiveness with lazy loading.

DevSync—MERN Stack Team Collaboration Platform (MongoDB, Express.js, React, Node.js)

- Implemented live team chat and real-time updates using WebSocket for seamless communication.
- Integrated Google Calendar API to schedule and sync sprints, deadlines, and meetings effectively.
- Utilized MongoDB for storing project boards, user data, and task logs, backed by a Node/Express API.

Achievements

- Advanced React (Coursera), Programming with JavaScript, Version Control (GitHub), Soft Skills
