

MOINUDDIN KHAN

Full Stack Software Engineer

Mumbai, India | moin06.dev@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | 9970-078-513

SUMMARY

Full Stack Software Engineer with 2+ years of experience designing and building scalable, cloud-native applications and AI-powered systems. Strong expertise in Node.js, NestJS, React, AWS, and microservices architecture. Proven ability to deliver business-impacting outcomes through performance optimization, automation, and clean system design. Experienced in collaborating with cross-functional teams, translating business needs into technical solutions

SKILL

- **Backend:** Node.js, NestJS, Express.js, REST APIs, WebSocket
- **Frontend:** React, JavaScript, HTML, Tailwind CSS
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Architecture:** Scalable APIs, Reusable Components, MVC Architecture, State Management
- **Cloud & Deployment:** Firebase, Vercel, Render, AWS
- **AI & Automation:** Python, LangChain, SentenceTransformers, LLM APIs
- **Tools:** Git, Postman, VS Code, Cloudflare

WORK EXPERIENCE

TRENDYWORKS

Feb 2025 - Current

- Developed scalable full-stack web applications and microservices using React.js, Node.js, NestJS, Express.js, MongoDB, and PostgreSQL, following clean and modular architecture principles.
- Built responsive, user-friendly interfaces and reusable components, improving development efficiency and reducing repetitive development effort by 25%.
- Contributed to an enterprise employee transportation platform, implementing route optimization, trip planning, ETA calculation, and vehicle capacity constraints using Map API OR Tools (VRP).
- Designed and optimized data models and database queries for trips, routes, drivers, and employees, supporting large-scale daily transportation operations.
- Integrated REST APIs, authentication systems, payment gateways, and third-party services to deliver secure and seamless application functionality.
- Built an AI-based email classification and auto-reply system using Python, LangChain, and SentenceTransformers, with a safe fallback to manual review.
- Optimized application performance through code improvements, reducing load times by nearly 35%, while resolving production issues and improving application stability.
- Troubleshoot and resolved application issues across frontend and backend systems, improving system reliability and ensuring smooth integration between APIs, services, and database layers.

EDUCATION

Master In Computer Application

2022 - 2024

Mumbai University

- Relevant coursework in web development, DBMS, and software engineering.
- CGPA: 8.24/10.

Bachelor of Science Computer - Information Technology

2019 - 2021

Mumbai University

- Relevant coursework in information technology, programming, and database management.
- CGPA: 7.77/10.

CERTIFICATIONS

- [Programming With JavaScript \(Coursera\)](#)
- [Advance React \(Coursera\)](#)
- [Version Control \(Coursera\)](#)
