SUMMARY

Full Stack Developer with (~2 years) of **experience in building scalable web applications** using the MERN stack. At Hudl, I worked on an internal tool called "**Whiteboard**," where I developed dynamic dashboards and integrated APIs like **Google Sheets and SportsRadar**. I'm skilled in React.js, Node.js, MongoDB, and SQL, with a strong focus on creating responsive UI components. My contributions helped optimize developer workflows, reducing development time by 35-40%.

SKILLS & TOOLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS/SCSS, Python
- **Frontend:** React.js, Next.js, Redux, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, Mongoose, SQL
- **Tools & Platforms:** Git/GitHub, Postman API, Firebase, Docker, VS Code, Figma

EXPERIENCE

Hudl - MERN Stack Developer | Nesco-IT Park, Mumbai, India - (Oct 2024 - Present)

- **Developed and maintained** an internal training platform, Whiteboard Hudl, using the MERN stack (MongoDB, Express.js, React, Node.js), focusing on tracking and improving employee performance across sports domains.
- Integrated real-time score logging with **Google Sheets API** (used to log scores in real time directly into Google Sheets for easy tracking and analysis).
- Connected third-party APIs like **SportsRadar API** (used to fetch live sports data such as player statistics and match details) and **Twilio API** (used for sending SMS alerts and notifications to users).
- Boosted backend performance by 40% using **Redis** (used for in-memory data storage and caching to speed up response times), SQL indexing (used to speed up database queries), and asynchronous request handling (used to handle multiple tasks simultaneously without blocking the main thread).
- Designed responsive dashboards using Recharts (used for creating dynamic charts and graphs) and Chart.js (used for rendering interactive data visualizations), along with Tailwind CSS (used for building fast and customizable UI components).

Trendy - Web Developer (Full Time) | Mumbai, India - (May 2024 - Sep 2024)

- **Converted to a full-time role** after a successful internship; continued enhancing scalable internal tools and frontend architecture using the MERN stack.
- Maintained and optimized component libraries (used **Storybook for component isolation** and React to create **reusable UI elements**), created advanced React dashboards (using Recharts for dynamic visualizations), and implemented lazy loading (used **React Lazy for improved performance** by only loading components when they are in view).
- Led integration of **custom analytics** modules using Recharts (for generating custom charts based on user data) and Chart.js (for rendering various types of visualizations such as bar charts, pie charts, and line charts).
- Collaborated closely with UI/UX designers and backend developers to ensure product scalability and visual consistency across platforms.

Trendy - Web Developer (Intern) | Mumbai, India - (Feb 2024 - May 2024)

- Built over **30+ reusable React components** (using React for component-based architecture), improving development speed by 40% and ensuring a cohesive user experience.
- Integrated payment APIs like **Razorpay API** (used for handling online payments) and **Cashfree API** (used for managing payment gateways and transactions), and set up **Firebase Auth** (used for user authentication and management).
- Contributed to core internal tools with a focus on usability, modularity, and performance optimization (used Web Vitals for performance measurement).
- Enhanced frontend load times and responsiveness with smart rendering (used React.memo and shouldComponentUpdate to prevent unnecessary re-renders), **code-splitting** (used React Lazy for splitting large JavaScript files into smaller chunks), and optimization strategies (used **WebPack** to bundle and optimize JavaScript files).

QUALIFICATION

- **MCA - Master Computer Application** | Post Graduation | Mumbai University | **CGPI - 8.24/10** - (2022 – 2024)
- **BSC - Information Technology** | Graduation | Mumbai University | **CGPI - 7.77/10** - (2019 – 2022)

CERTIFICATIONS

- [Programming with JavaScript](#)
- [Advanced React](#)
- [HTML and CSS in depth](#)
- [React Basic](#)
- [Version Control/Git](#)
- [Front-End Development](#)
- [Enhancing Soft Skill and Personality](#)
