

Moinuddin Khan

Software Engineer | Front-end Developer | FullStack Developer

Mumbai, India | moin06.dev@gmail.com | 9970078513 | [LinkedIn](#) | [Portfolio](#) | [Git.moin06.dev](#)

Full Stack Developer with ~2 years of experience building scalable web applications using the MERN stack. Skilled in developing RESTful APIs, improving backend performance (Redis caching, SQL indexing), and integrating services like Google Sheets, SportsRadar, and Twilio. Proficient in creating responsive UIs with React and Tailwind CSS, and visual dashboards using Chart.js and Recharts. Experienced in deploying applications on AWS and optimizing security and speed with Cloudflare, with a strong focus on clean code and usability.

SKILLS

Languages: JavaScript (ES6+), Python, HTML, CSS

Frontend Development: React.js, Next.js, Tailwind CSS, Bootstrap, Material-UI

Backend Development: Node.js, TypeScript, Express.js, REST API, GraphQL

Data Visualization: Recharts, Chart.js

State Management & Optimization: Redux, React Query, Lazy Loading, Code Splitting, Webpack

Testing: Jest, React Testing Library

Version Control & CI/CD: Git, GitHub, GitHub Actions

Tools & Platforms: VS Code, Figma, Storybook, Firebase, GoogleAnalytics4(GA4)

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer

APR 2025 - Current

Remote & On-site

- Working with startups and individual clients to build full-stack applications using the MERN stack.
- Clients acquired via LinkedIn outreach, referrals, and local network.
- Built a metrics dashboard using Recharts and Chart.js (improved reporting workflow by ~35%), a scheduling module with React Hook Form + Day.js + Nodemailer, and a dynamic content panel using React, Express, and MongoDB.
- Used Tailwind CSS for responsive UI design, deployed apps via Vercel and AWS (EC2/S3).
- Occasionally worked on-site for deployment/testing. Focused on performance, code clarity, and ease of use.

Hudl – MERN Stack Developer (Contract)

Oct 2024 to Mar 2025

Nesco-IT Park, Mumbai, India

- Collaborated with the team to develop and maintain an internal training platform called Whiteboard, built using the MERN stack, focused on tracking and improving team performance.
- Integrated third-party APIs including Google Sheets (for real-time data sync), SportsRadar (for live sports data), and Twilio (for SMS alerts and notifications).
- Improved backend performance by ~40% using Redis caching, SQL indexing, and asynchronous operations in Node.js.
- Built responsive dashboards with Recharts and Chart.js to visualize key performance metrics in real time.
- Designed and styled UI components using Tailwind CSS, ensuring cross-device responsiveness and clean user experience.

Trendy – Web Developer (Intern → Full Time)

Feb 2024 to Sep 2024

Mumbai, India

- Joined as an intern and converted to full-time based on performance; contributed to internal tools and frontend systems using the MERN stack.
- Built and maintained 30+ reusable React components, improving development speed by ~40%.
- Integrated Razorpay and Cashfree APIs for handling payments, and implemented Firebase Auth for secure authentication.

- Developed analytics dashboards using Recharts and Chart.js, enabling better decision-making through visual insights.
- Applied performance enhancements using React.memo, React Lazy, and Webpack.
- Used Storybook to document UI components and worked with designers for responsive UIs with Tailwind CSS.
- Improved frontend performance using Web Vitals to enhance usability and load speed.

PROJECTS

Tour & Travel – Explore Destinations (React, Tailwind CSS, React Router, Framer Motion, Axios, Geolocation API)

- Built an interactive travel website featuring destination galleries, filter options, and smooth UI animations using Framer Motion, increasing user engagement by 40%.
- Integrated **Geolocation API** and **Axios** for personalized travel suggestions (e.g., nearby spots, weather-based tips), Enhanced user experience with dynamic, location-aware content.
- Designed a visually striking, **mobile-friendly layout** using Tailwind CSS, ensuring cross-device compatibility and scalability.
- Achieved **80% component reusability** with modular design patterns, enabling future feature expansion.

Book Store – Online Book Marketplace (React, Tailwind CSS, React Router, Axios, REST API, LocalStorage)

- Designed and developed a modern book e-commerce platform with seamless navigation and advanced search functionality, boosting user discoverability by 35%.
- Utilized **Axios** to fetch book data from API and implemented **cart management with LocalStorage**, ensuring smooth session handling.
- Built responsive and reusable components with Tailwind CSS, resulting in 90% code modularity and consistency across all pages.
- Ensured 100% responsiveness with **mobile-first design principles** and lazy loading, improving page **load speed by 30%**.

DevSync - MERN Stack Team Collaboration Platform (MongoDB, Express.js, React, Node.js)

- Implemented live team chat and real-time updates using **WebSocket** for seamless communication.
- Integrated **Google Calendar API** to schedule and sync sprints, deadlines, and meetings effectively.
- Utilized MongoDB for storing project boards, user data, and task logs, backed by a Node/Express API.
- Designed a responsive and **interactive UI** with React and Tailwind CSS, using custom **reusable components**.
- Visualized team performance and task progress with **interactive charts using Chart.js** for sprint retrospectives.
- Integrated **Auth0** for secure user authentication, enabling personal board and team space management.

QUALIFICATION

Master of Computer Applications (MCA) | Post Graduation

Mumbai University - (2022 - 2024)

- CGPA 8.24

BSC - Information Technology (BSC-IT) | Graduation

Mumbai University - (2019 - 2022)

- CGPA 7.77

ADDITIONAL INFORMATION

Languages: English, Hindi

Certifications:

- Programming with JavaScript
- Advanced React
- HTML and CSS in depth
- React Basic
- Version Control/Git
- Front-End Development
- Enhancing Soft Skill and Personality
